

Client-side Technologies (HTML&CSS)

Add to your website from Lab1 the following:

1) Create Registration Form that includes the following fields

- User first name field
- User last name field
- User email field
- Password field
- Gender field
- Country field where the user should select from a dropdown list his country according to Continent group
- Birthday field where the user can select month from a dropdown list, the date and year of born in a field
- The user should select his interest from (Sports, Music, reading books ...etc.) use check box
- Write your bio on a text area, prevent it from being resized.
- Bind each label with its form field
- The form should have a submit and a reset button.
- This form should be designed inside a table

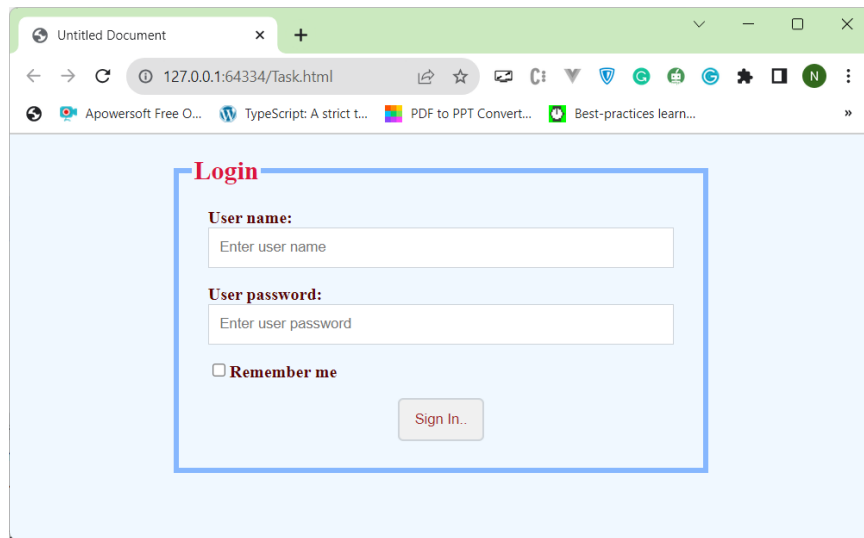

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:64334/Task.html'. The page contains a registration form titled 'Registration Form'. The form is structured as follows:

First Name	<input type="text" value="Enter your first name"/>
Last Name	<input type="text" value="Enter your last name"/>
Email	<input type="text" value="Enter your email"/>
Password	<input type="password" value="Enter your password"/>
Gender	<input type="radio"/> Female <input type="radio"/> Male
country	<input type="text" value="Select a Country..."/>
Birthday	<input type="text" value="mm/dd/yyyy"/>
Interests	
<input type="checkbox"/> Sports	<input type="checkbox"/> Music <input type="checkbox"/> Fashion
<input type="checkbox"/> Reading	<input type="checkbox"/> Shopping <input type="checkbox"/> Movies
Bio	
<div></div>	
<input type="button" value="Register"/> <input type="button" value="Clear"/>	

2) Create a login form that includes the following fields

- User name
- Password
- Remember me check box
- Use accesskeys attributes over all form fields
- Bind each label with its form field
- The form method should be GET
- The login button send data to main page of your website (page2)

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:64334/Task.html'. The browser's tab is titled 'Untitled Document'. The page content features a light blue background with a white rectangular login form in the center. The form is titled 'Login' in red. It contains three input fields: 'User name:' with a placeholder 'Enter user name', 'User password:' with a placeholder 'Enter user password', and a checkbox labeled 'Remember me'. A 'Sign In..' button is located at the bottom right of the form.

3) let your website redirect to registration form after 5 seconds from home page (page1)

4) let your website goes to login form when user click enter image in home page (page1)

5) Apply proper style for the two forms.
